#### **QUIT ARGUMENTS** FOR FISTICIIFFS

Lawyers Berkeley and Read Do Battle in Court at Newport News.

[Special to The Times-Dispatch.] Newport News, Va., January 3 .- Captain C. C. Berkeley, who is Commonwealth's attorney here, and Attorney J. Winston Read engaged in a fisticust in the Corporation Court to-day during the trial of a civil suit in which they were opposing counsel. Captain Berkeley was the aggressor, striking Mr.

Read as the latter was arising from his chair, in resentment of remarks which the captain regarded as offersive. Mr. Read sustained a "black" eye as the result of the blow.

City Sergeant C. C. Curtis and other court officers separated the combatants, but not until several blows had been passed, Mr. Read striking Captain Berkeley once or twice, but leaving no marks.

Marks.

After both attorneys had made statements to the court, Judge Barham imposed a fine of \$5 on Captain Berkeley.

The court said that it realized that neither attorney had meant any offense to the court, but the court could not allow such a procedure without im-posing a fine.

Both Captain Berkeley and Mr. Read

are widely-known lawyers, and the fight created a sensation here.

FORESTRY WORK.

Uncle Sam Getting in Earnest About Good Work So Long Delayed. In the East the work of the Federal gov ernment is to-day far more effective than ever before. The establishment of national forests under the provision of the Weeks law is accomplishing many results not anticipated even by its most earnest advocates. The purchase of lands on important watersheds in the White Mountains and Southern Appalachians is steadily progressing. Already contracts for over 700,000 acres have been approved by the National Forest Reservation Commission. These lands are located on the most important watersheds, and have been secured at prices representing their actual value, the average being \$5.07 an acre. It has already been demonstrated that the building up of national forests by purchase and at reasonable prices is practicable. The first effect of these purchases has been an educational one. The wide interest in the work has resulted in an awakened appreciation of forest protection and forestry wherever the government has been examining land for purchase. Co-operation in forestry between the government and the States has received a great stimulus. The actual annual saving from loss on areas protected from fire directly as a result of the Weeks law, on private, as well as public property, would amount to a very large agregate sum. In short, the Weeks law is now yielding results which fully justify the new policy which it established.
